\*All classes must have a minimum registration of 8 students in order to continue

## **Art Exploration I**

Students will turn on their creative juices and be encouraged to explore a variety of media, including collage, paint, clay, oil pastel and found objects. Young artists will have fun while learning about art every week.

Instructor: Ana Batiz  
Materials Fee: \$25

## **Art Exploration II**

Students will work on still-life and observational drawing exercises that will include fun and relatable subject matter: food, toys, etc. Lessons often evolve into creative final products that will excite and motivate your young artist. A variety of media will be used such as graphite, chalk and watercolor. Students learn from their peers and work in an atmosphere that focuses on studio production and creative output.

Instructor: Ana Batiz  
Materials Fee: \$25

## **Baking**

Students will learn all about leavening and what makes cakes and bread rise. Recipes made in this class will include chocolate banana bread, marble cake, chocolate sugar cookies, and many more. During special holidays, there will be holiday-themed recipes.

Instructor: Chef Omar Garcia  
Materials Fee: \$10

## **Chess 101**

Chess subtly teaches children all the qualities of a noble king or queen: Perseverance, Nobility, Courtesy, Benevolence, Responsibility, problem solving, confidence, sportsmanship, planning, patience, social skills, critical thinking, imagination and more. And if that weren't enough, it's also super awesome fun! In this class we'll start at the beginning to discover all the different characters(pieces) of Chess and background information about who they are and where they come from. Then it's onto how they move on the board and the rest of the dynamic rules of this 2000 year old Game of Kings!

Instructor: Brian Julian ([Kids to Kings](#))  
Materials Fee: \$10

## **Chess Lab**

This class offers individualized chess instruction for students who are familiar with the game and have played chess before. Students will learn chess notation and complete some assignments on their own. **Students must have participated in some beginning chess class, or require the permission of [Mr. Moody](#).**

Instructor: Mike Moody  
Materials Fee: \$10

## **Cooking**

In this class students will dive right into a hands-on cooking experience with cuisine from around the world. Students will learn about nutrition, food preparation, sanitation as well as the culture and history of the recipes being prepared. Chef Omar and his students will visit countries like Japan with a Soba noodle dish, try the delicate spices from Oaxaca Mexico with a green salsa enchiladas, French Mustard Chicken from France, Tuscan orzo chicken from Italy, Spanish Empanadas from Spain, spinach grilled cheese from Greece, to classic Chinese Chow Mein. All dietary and allergy restrictions will be shared with Chef Omar and his recipes will reflect these criteria.

Instructor: Chef Omar Garcia  
Materials Fee: \$10

### **Futsal**

Beginner athletes will learn the fundamentals of the fast and furious sport of Futsal through: passing, receiving, running, shooting, dribbling, and goalkeeping.

Instructor: Coach Leo Matos

### **Fun Friday Field and Court Games**

Start your weekend off with Coach Matos as he gets you actively involved in fun games on both the field and court.

Instructor: Coach Leo Matos

### **Guitar for Beginners**

This class will introduce students to the language of music and performance by learning the guitar. Students learn basic chords, musical notation, guitar fingering, and songs of course! **Each student will need their own guitar.** If a student doesn't own a guitar, they can rent one at [Adam's Music](#).

Instructor: Cooper Walker

Materials Fee: \$10

### **Houdini's Magic Workshop**

Alakazam! Welcome to Houdini's Magic Workshop where we will put our illusion and trickery skills to the test

Instructor: Ace Enrichment

### **Improv**

Who doesn't love to laugh? Think on your toes; develop your group collaborative skills, confidence, creativity and stage presence.

Instructor: Ace Enrichment

### **Junior Robotology**

Using Lego BOOST, students will build our high-tech robots and creations using color and motion sensors, gears, motors, pulleys, and tons more! Then, we'll put our robots to the test as we try to get them to beat our mazes, sound the alarm, and tons more. Eggheads get to control their robots, move them, and complete each challenge at the end of the day! At the end of the session, students will get their very own Lego Kit and Egghead Robotics degree, certifying them to make their creations! Robotics has NEVER been this cool!

Instructor: Professor Egghead

### **LEGO Engineering: Super Structures**

Come join the Egghead Engineering Team we design and build huge structures! Using LEGO™, students will build mega bridges, 4 foot tall skyscrapers, gigantic pyramids, and tons more. Then, we'll try to knock em down, crush them, and put them to the test! At the end of the session, students will receive an Egghead Engineering Super Structures Degree.

Instructor: Professor Egghead

### **Music Makers**

Ms. House will share her love for music through engaging activities such as instrument playing (percussion and xylophone), movement, and singing. Students will learn about rhythm, melody, and harmony.

Instructor: Shaina House

Materials Fee: \$10

### **Professor Egghead Explorers**

Strap on your gear, get on your binoculars, and join the Egghead Explorer Squad as we fizz, pop, mix, and experiment our way around the Earth! As Egghead Explorers, students will make a sundial to keep track of the time, a flashlight to see in the dark, fake tar pits, fossils, volcanoes, snow, magnetic bumper cars, and tons more. The best part? They get to take it all home! All Eggheads will also get their Explorer ID card, authorizing them to use real science to explore the globe. At the end of the session, students will receive an Egghead Explorer Degree.

Instructor: Professor Egghead

### **Robotics Revolution**

Using **advanced** Lego BOOST, students will build our high-tech robots and creations using color and motion sensors, gears, motors, pulleys, and tons more! Then, we'll put our robots to the test as we try to get them to beat our mazes, sound the alarm, and pass our challenges. To do that, we need to code our robots. Using Visual Programming, all Eggheads will code their own commands for their robots to make them move, talk, react, and give them a personality all their own! At the end of the session, students will get their very own Lego Kit and Egghead Robotics degree, certifying them to make their creations! Robotics has NEVER been this cool!

Instructor: Professor Egghead
